

TONELLI Honey CombFICHE MACHINE EN
LIGNEMARQUE **TONELLI**CODE **F06092**MODÈLE **Honey Comb**TYPE **HONEY-COMB PROCESSING MACHINE****DÉTAILS TECHNIQUES**

This machine is useful for the process (opening and stretching) of honey-comb foils. This honey-comb is used as core for the inside part of flush-panels in the doors & furniture production. The machine is mainly divided in 3 sections:

- 1) In-feed of the pressed (compact) honey-comb material
 - 2) Pressure and cut-to-size (lengthwise) of the pressed (compact) honey-comb material
 - 3) Stretching (by heated air) of the cut-to-size honey comb
- With PLC to run the working process (length of honey-comb, quantity, etc.)
 - With in-feed table mm 600 x 1530
 - With 8 motorized conveying belts (KW 0.37) on the in-feed table
 - With 2 pressing and feeding rollers (1 top & 1 bottom) width mm 400
 - With 1 cutting unit (with circular saw, diam. mm 500 approx.) power KW 2.2
 - With 2 vertical motorized belts (1 left & 1 right) to infeed the honey-comb to the oven
 - With 2 speed-variators (KW 0.09 each) for the vertical motorized belts (1 left & 1 right)
 - With oven (with pipes for the hot water circulation) and fan for the hot air circulation
